Packing List

Before setting up your product, please make sure the following items have been shipped:

Item	Quantity
● BOXER-8410AI	1
● Wallmount bracket	2
● Screw Package	1

If any of these items are missing or damaged, please contact your distributor or sales representative immediately.

About this Document

This User's Manual contains all the essential information, such as detailed descriptions and explanations on the product's hardware and software features (if any), its specifications, dimensions, jumper/connector settings/definitions, and driver installation instructions (if any), to facilitate users in setting up their product.

Users may refer to the product page at AAEON.com for the latest version of this document.

Safety Precautions

Please read the following safety instructions carefully. It is advised that you keep this manual for future references

1. All cautions and warnings on the device should be noted.
2. All cables and adapters supplied by AAEON are certified and in accordance with the material safety laws and regulations of the country of sale. Do not use any cables or adapters not supplied by AAEON to prevent system malfunction or fires.
3. Make sure the power source matches the power rating of the device.
4. Position the power cord so that people cannot step on it. Do not place anything over the power cord.
5. Always completely disconnect the power before working on the system's hardware.
6. No connections should be made when the system is powered as a sudden rush of power may damage sensitive electronic components.
7. If the device is not to be used for a long time, disconnect it from the power supply to avoid damage by transient over-voltage.
8. Always disconnect this device from any AC supply before cleaning.
9. While cleaning, use a damp cloth instead of liquid or spray detergents.
10. Make sure the device is installed near a power outlet and is easily accessible.
11. Keep this device away from humidity.
12. Place the device on a solid surface during installation to prevent falls
13. Do not cover the openings on the device to ensure optimal heat dissipation.
14. Watch out for high temperatures when the system is running.
15. Do not touch the heat sink or heat spreader when the system is running
16. Never pour any liquid into the openings. This could cause fire or electric shock.

17. As most electronic components are sensitive to static electrical charge, be sure to ground yourself to prevent static charge when installing the internal components. Use a grounding wrist strap and contain all electronic components in any static-shielded containers.
18. If any of the following situations arises, please the contact our service personnel:
 - i. Damaged power cord or plug
 - ii. Liquid intrusion to the device
 - iii. Exposure to moisture
 - iv. Device is not working as expected or in a manner as described in this manual
 - v. The device is dropped or damaged
 - vi. Any obvious signs of damage displayed on the device
19. **DO NOT LEAVE THIS DEVICE IN AN UNCONTROLLED ENVIRONMENT WITH TEMPERATURES BEYOND THE DEVICE'S PERMITTED STORAGE TEMPERATURES (SEE CHAPTER 1) TO PREVENT DAMAGE.**

Warning!

This device complies with Part 15 FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received including interference that may cause undesired operation.

Caution:

There is a danger of explosion if the battery is incorrectly replaced. Replace only with the same or equivalent type recommended by the manufacturer. Dispose of used batteries according to the manufacturer's instructions and your local government's recycling or disposal directives.

Attention:

Il y a un risque d'explosion si la batterie est remplacée de façon incorrecte. Ne la remplacer qu'avec le même modèle ou équivalent recommandé par le constructeur. Recycler les batteries usées en accord avec les instructions du fabricant et les directives gouvernementales de recyclage.

2.5 Wall Mount Assembly

2.6 2.5" SATA Storage Drive Assembly

Before beginning the installation procedure for the 2.5" SATA storage device, ensure your BOXER-8410AI system is shut down (not in sleep or standby mode) and disconnected from power source.

Step 1: Remove the six screws from the bottom panel as shown in the figure.

Step 2: Remove the four screws holding the 2.5" SATA drive carrier, and then remove the carrier from the system.

Step 3: Place your 2.5" SATA storage device in the carrier and secure with four screws as shown. Connect the SATA and SATA power cables to the storage device.

Step 4: Following Steps 1 and 2 in reverse order, place the 2.5" SATA storage device and carrier assembly into the BOXER-8410AI system, securing with the four screws removed in Step 2. Then replace the bottom panel and secure with the six screws removed in Step 1.

Chapter 3

OS Flash guide

3.1 Introduction

This section details the steps to flash the operating system (OS) onto the BOXER-8410AI.

Before beginning make sure you have the following prepared:

- BOXER-8410AI PCBA removed from chassis (refer to as DUT)
- Host PC with Windows 7 (Note: Process is only compatible with Windows 7)
- OS image for BOXER-8410AI. Contact your AAEON representative or supplier for image
- Get HiTool program to flash image

3.2 Hardware Pinout Definition

Refer to the image below for relevant connectors and pins during the image flashing process.

BOXER-8410AI DUT

3.3 Flash Image Steps

1. Connect host PC and DUT with a Micro-USB cable.
2. Connect the 12V DC-IN with a power adapter and ensure it is plugged into a 12V power source.
3. On host PC, extract/unzip the image and content files for BOXER-8410AI. You should see the following files.

6. Open the "Burn eMMC or UFS" tab.

7. Fill out the partition table in HiTool. Refer to the README.txt file from the extracted BOXER-8410AI image for details.

8. Click the "Burn" button in HiTool.

- 9. On the DUT, press and release the Power Button.

- 10. Next, press and hold the Update Button.

- 11. While holding the Update Button, press and release the Reset Button.

12. Keep holding the Update Button for 2 more seconds after pressing the Reset Button, then release.

13. HiTool should display burning process in progress.
